

ottobock.

Move people.

Through your work. With us.

Quality for life

About Ottobock

Mobility for people – that’s what the Ottobock name has represented for some 100 years. We move people worldwide with our products and services in Prosthetics and Orthotics as well as Human Mobility and Patient Care. Our 7,000 employees in more than 50 countries work every day to help people with limited personal mobility obtain greater independence and improve their quality of life.

We pursue this mission in our daily work. This mission connects us to each other and the people who come into contact with us.

Innovations are an equally important growth driver as the people who stand behind the products and services with their ideas and dedication. They keep the world of Ottobock in motion with playfulness and creativity. This results in a wide range of career opportunities.
